PORTFOLIO

GitHub: <https://github.com/pmarti9>

Portfolio: https://pmarti9.github.io/react_portfolio/

LinkedIn: <https://www.linkedin.com/in/parker-martin-a5361147/>

SKILLS

Backend Development:

Golang, Python, Java (Spring Boot), PHP (Laravel), Node.js (Express.js), handlebars (template engine), Groovy, REST API experience with all of these languages/Frameworks

Databases:

MySQL, MongoDB, Postgres, Amazon Redshift, Google Cloud Spanner and some ORMs (Sequelize, Mongoose, Eloquent ORM),

Quality Assurance:

Integration testing with python and go, manual QA processes, design docs, test plans, regression testing, CrossBrowserTesting, Load testing with locust (python) and k6 (javascript)

Front-end Development:

JavaScript, React, Vue and Angular 2+ frameworks, HTML, CSS (and some CSS frameworks), Axios, AJAX, some PHP/Blade

Cloud Technologies:

AWS: Lambda, SQS, SNS, S3, MSK, EC2, ECS (Fargate), ASM (Secrets manager), KMS, and others...

GCP: Pubsub, Cloud Spanner, Compute Engine, etc..

Misc:

Kubernetes, Docker, Kafka, Data serialization with Avro, JSON or Protobuf, version control (git, Github and Gitlab), Jenkins, GitlabCi/CD, Github Actions, kubectl/k9s software

Non development related work skills:

Finance: credit cards, payment processing technologies, student loans and relevant documents as well as collections/customer experience

Healthcare: X12, FHIR and HL7 documents (mainly HL7)

WORK EXPERIENCE

Route Sense Inc.

Lead Software Engineer

NOVEMBER 2025 - CURRENT

Accomplishments:

- Designed and implemented a **real-time MID health scoring engine** to monitor risk, compliance thresholds, and performance across merchant accounts
- Engineered **adaptive transaction routing systems** to maximize approvals and dynamically respond to processor constraints and downtime

Responsibilities:

- Developed and maintained **Go-based backend services deployed on AWS** for high-volume transaction processing
- Designed and implemented **event-driven systems (SQS/SNS)** for asynchronous processing and service coordination
- Built and executed **Python-based load tests** to validate performance under production-like traffic
- Collaborated with frontend and product teams to define and deliver APIs for internal and client-facing tools

Equifax

Software Engineer

JANUARY 2023 - NOVEMBER 2025

All Accomplishments:

- Became one of the subject matter experts for Avro data serialization and how to use an internal shared library for testing/implementing
- Wrote an internal tool that was used on my team and some others to create GCP resources in a docker container
- Wrote integration tests for many services that validated functionality and got code pushed to production
- Created proof of concept using OIDC/OAuth2 standard for a future production update that was used

Current responsibilities:

- Backend Development with Golang
- Microservices architecture
- Experience using GCP and its products (Spanner, Pubsub, Compute Engine, etc..)
- Integration testing with Golang

- Legacy codebase is Laravel/PHP monolith along with some older go/python for microservices running on AWS and using SQS/SNS for messaging
- Used gitlab CI for deployments
- Currently using Jenkins and Github Actions for deployments

Utah Health Information Network

Software Engineer

Accomplishments:

- Created POC for a data pipeline to gather claim and clinical data
- Used the POC as a basis for creating the actual pipeline
- Learned Java 6 months into the job as part of a team change

NOVEMBER 2022 - DECEMBER 2022

- Ensures design, application and maintenance of software meets UHIN standards
- Back end experience using PHP (Laravel/Lumen framework) for non data pipeline data
- Back end experience using Java, Kafka and KSQL and relevant technologies
- Database experience including MySQL, PostgreSQL, Amazon Redshift, DynamoDB
- AWS experience (S3, Lambda, MSK)
- Microservices
- Used Gitlab CI for deployments

Jr Software Engineer

MARCH 2021 - NOVEMBER 2022

- Ensures design, application and maintenance of software meets UHIN standards
- Front end JS development using Vue.js
- Back end experience using PHP (Laravel/Lumen framework) for non data pipeline data
- Back end experience using Java, Kafka and KSQL and relevant technologies
- Database experience including MySQL, PostgreSQL, Amazon Redshift, DynamoDB
- AWS experience (S3, Lambda, MSK)
- Microservices
- Used Gitlab CI for deployments

InMoment - Application Specialist/Technical Success Manager

SEPTEMBER 2017 - FEBRUARY 2021

Accomplishments:

- Helped launch one of the biggest clients on the InMoment platform

- Created a dynamic groovy script that would dynamically display data in the email invite and survey based on data sent over an API or FTP
- Trained newer application specialists/TSMs (technical success managers) to utilize the platform better

Responsibilities:

- Build customer experience surveys and customized reporting solutions using the proprietary application, as well as Implement and QA the solution for clients as well as advising clients on technical challenges as they arise. This will help provide a successful CX program
- Import client/customer data via API/SFTP into the InMoment platform for survey invites or data imports. Ensures correct data for the client and enhances their program
- Apply HTML/CSS, JavaScript and Groovy to validate or update different survey/application functionality. Allows a good user experience taking a survey

Discover Financial Services - Multiple Roles - see below

All Accomplishments

- Was a Test lead on a project involving country of citizenship validation and loan application updates
 - Delegated testing responsibilities throughout the team through this effort
- Was the subject matter expert on the team for an internal system that we were testing
- Won elite award 4 times in a year when on the student loan originations/servicing team for having high scores on call reviews
- Helped improve the cosigner release process
- Consistently was a top performer on early stage collection teams
- Consistently had great call review scores

Analyst, QA (UAT Tester)

APRIL 2016 - AUGUST 2017

- Validate functionality of new updates to the current system before production
- Write and execute all test cases (including end to end / regression testing) via Microsoft Excel based on Business Requirement documents (BRD) and high level design documents (HLD)
- Upload test cases via Excel using the HP ALM add-on/plugin
- Validate test cases and test results against the test plan and applicable wireframes
- Write bugs/defects as they occur within HP ALM during testing and work with dev to ensure they are tracked, deployed and fixed accordingly

- All of these bullet points ensure a successful product deploy and they allow a good user experience

Student Loans Back Office Specialist

MARCH 2015 - MARCH 2016

- Verified loan documents during the application process. Allows applications to proceed with the process
- Processed cosigner release applications. This helps the customers with their loan documents

Student Loans Servicing Representative

MAY 2014 - MARCH 2015

- Took applications for potential and current borrowers/cosigners and educated customers on repayment benefits as well as service loans post origination

Senior Collections Specialist

DECEMBER 2007 - APRIL 2014

- Collected on past due balances

EDUCATION

University of Utah - *Certificate of Completion - Coding Bootcamp*

FEBRUARY 2020 - AUGUST 2020

Utah State University - *B/S In Business Management/Administration*

MAY 2012 - MAY 2014

Salt Lake Community College - *A/S In Business Management/Administration*

MAY 2007 - MAY 2012
